[Perspectives on Grammaticalization](#) Apr 22 2022 This is the second of two volumes deriving from papers presented at the Nineteenth Annual UWM linguistics Symposium held in Milwaukee in 1990. It focuses on the evolution of grammatical form and meaning from lexical material, which has reinvigorated historical analysis and theory and led to advances in the understanding of the relation between diachrony and universals. The richness and potential of some of the leading approaches to grammaticalization are here illustrated in thirteen selected papers.

The Form and Function of Mark 1:1–15 Jul 25 2022 Identifying the "scenes" of written texts is a critical skill for following the course set by an author. Even a small variation in course heading can result in compounding an error over time with regard to one's intended destination. Perhaps nowhere is this more important than in the opening unit of Mark's Gospel. In this book, Brad Johnson sets out to follow the course prescribed by the author of the second Gospel. Making use of the principles of Inductive Bible Study, rhetorical criticism, and a study of ancient prologues, Johnson makes a twofold case that Mark's opening unit (the first fifteen verses) demonstrates a formal integrity and performs a rhetorical function. As such, the Markan prologue situates the public life and ministry of Jesus within the broader context of an epic drama. A failure to acknowledge the unique contribution of Mark as author in this regard will likely result in a destination the author never intended.

Jesus the Teacher Mar 29 2020 "This book makes an important, indeed a groundbreaking, contribution to Markan studies. Not only does it address a lacuna in these studies, but it does so by means of an innovative methodology... that permits a satisfying integration of the Jewish background of Mark's Gospel with its Greco-Roman background while retaining a sensitivity to the literary dimensions of the text as well as an interest in its reader. Robbins has accomplished a remarkable feat... Markan studies are certain to benefit greatly from this work." -Jouette M. Bassler Journal of Biblical Literature "Robbins proposes a challenging alternative to current approaches to the study of Mark by demonstrating that its literary qualities are inseparable from ancient social conventions in which Greco-Roman traditions are no less relevant than those of the Old Testament and early Judaism. This book is a major contribution to Markan scholarship as well as an incisive critique of some of the self-imposed limitations of contemporary New Testament research." -David E. Aune University of Notre Dame "In this important contribution to Markan studies, Robbins demonstrates that contemporary approaches to the New Testament can lead to genuinely new and fruitful insights." -Richard I. Pervo Anglican Theological Review "This volume breaks new ground in Markan study in the areas of historical background, genre, structure, plot, and theology... It contains more fresh ideas than most books of its size." -Daniel J. Harrington, S.J. Catholic Biblical Quarterly Vernon K. Robbins is Professor of New Testament and Comparative Sacred Texts in the Department and Graduate Division of Religion at Emory University in Atlanta. He was appointed Winship Distinguished Research Professor in the Humanities in 2001. Among his many books are The Tapestry of Early Christian Discourse and Exploring the Texture of Texts.

Inspired Wire Jun 12 2021 Inspired Wire guides wireworkers of all levels through a personal journey of design and creativity. The author mentors the reader, smoothly introducing techniques and skills as they progress together from making simple to sophisticated jewelry. Clear instructions, a unique building-block approach to basics, step-by-step photographs, and an eight-page gallery of the author's work make this book a stunning addition to any jewelry maker's collection. 36 projects in all.

Australian Languages Dec 18 2021 This book addresses controversial issues in the application of the comparative method to the languages of Australia which have recently come to international prominence. Are these languages 'different' in ways that challenge the fundamental assumptions of historical linguistics? Can subgrouping be successfully undertaken using the Comparative Method? Is the genetic construct of a far-flung 'Pama-Nyungan' language family supportable by classic methods of reconstruction? Contrary to increasingly established views of the Australian scene, this book makes a major contribution to the demonstration that traditional methods can indeed be applied to these languages. These studies, introduced by chapters on subgrouping methodology and the history of Australian linguistic classification, rigorously apply the comparative method to establishing subgroups among Australian languages and justifying the phonology of Proto-Pama-Nyungan. Individual chapters can profitably be read either for their contribution to Australian linguistic prehistory or as case studies in the application of the comparative method.

Structuring Sense: Volume III: Taking Form Aug 26 2022 Structuring Sense explores the difference between words however defined and structures however constructed. It sets out to demonstrate over three volumes that the explanation of linguistic competence should be shifted from lexical entry to syntactic structure, from memory of words to manipulation of rules. Its reformulation of how grammar and lexicon interact has profound implications for linguistic, philosophical, and psychological theories about human mind and language. Hagit Borer departs from language specific constructional approaches and from lexicalist approaches to argue that universal hierarchical structures determine interpretation, and that language variation emerges from the morphological and phonological properties of inflectional material. Taking Form, the third and final volume of Structuring Sense, applies this radical approach to the construction of complex words. Integrating research in syntax and morphology, the author develops a new model of word formation, arguing that on the one hand the basic building blocks of language are rigid semantic and syntactic functions, while on the other hand they are roots, which in themselves are but packets of phonological information, and are devoid of both meaning and grammatical properties of any kind. Within such a model, syntactic category, syntactic selection and argument structure are all mediated through syntactic structures projected from rigid functions, or alternatively, constructed through general combinatorial principles of syntax, such as Chomsky's Merge. The meaning of 'words', in turn, does not involve the existence of lexemes, but rather the matching of a well-defined and phonologically articulated syntactic domain with conceptual Content, itself outside the domain of language as such. In a departure from most current models of syntax but in line with many philosophical traditions, then, the Exo-Skeletal model partitions 'meaning' into formal functions, on the one hand, and Content, on the other hand. While the former are read off syntactico-semantic structures as is usually assumed, Content is crucially read off syntactico-phonological structures.
