Handbook of Global Urban Health Mar 06 2021 Through interdisciplinary and multidisciplinary perspectives, and with an emphasis on exploring patterns as well as distinct and unique conditions across the globe, this collection examines advanced and cutting-edge theoretical and methodological approaches to the study of the health of urban populations. Despite the growing interest in global urban health, there are limited resources available that provide an extensive and advanced exploration into the health of urban populations in a transnational context. This volume offers a high-quality and comprehensive examination of global urban health issues by leading urban health scholars from around the world. The book brings together a multi-disciplinary perspective on urban health, with chapter contributions emphasizing disciplines in the social sciences, construction sciences and medical sciences. The co-editors of the collection come from a number of different disciplinary backgrounds that have been at the forefront of urban health research, including public health, epidemiology, geography, city planning and urban design. The book is intended to be a reference in global urban health for research libraries and faculty collections. It will also be appropriate as a text for university class adoption in upper-division under-graduate courses and above. The proposed volume is extensive and offers enough breadth and depth to enable it to be used for courses emphasizing a U.S., or wider Western perspective, as well as courses on urban health emphasizing a global context.

The Palgrave Handbook of Asian Cinema Dec 03 2020 This collection offers new approaches to theorizing Asian film in relation to the history, culture, geopolitics and economics of the continent. Bringing together original essays written by established and emerging scholars, this anthology transcends the limitations of national borders to do justice to the diverse ways in which the cinema shapes Asia geographically and imaginatively in the world today. From the revival of the Silk Road as the "belt and road" of a rising China to historical ruminations on the legacy of colonialism across the continent, the authors argue that the category of "Asian cinema" from Turkey to the edges of the Pacific continues to play a vital role in cutting-edge film research. This handbook will serve as an essential guide for committed scholars, students, and all those interested in the past, present, and possible future of Asian cinema in the 21st century.

Objects to Learn about and Objects for Learning 2 Jan 04 2021 Resulting from a conference that took place in Amiens, France, in June 2019, this book examines the place and role of objects centered in teaching practices from kindergarten to university, both in the context of France and elsewhere. These "objects for learning" are considered in their physicality as productions, work or signs that are used for learning. They become "objects to learn about" when the object itself is the learning objective. This book offers a cross-disciplinary perspective, linking the different disciplinary fields studied and the many reference sources used by the authors. This two-volume work offers an overview of current research on the subject, with this second volume focusing on objects in representations of space and time, then on learners' activities in the making or use of objects, before concluding with different cultural and philosophical perspectives on objects

Beyond Sustainability Sep 19 2019 This book approaches environmentalism via two academic disciplines, sociology and philosophy. Both have concerns about the environment's ability not only to sustain itself but to thrive. The authors argue that rather than simple sustainability, we must promote thriving for the sake of protecting the environment and all living things. In this greatly expanded second edition, the authors have updated data and examples, introduced new topics and concepts, and emphasized the need to lessen our dependence on fossil fuels. Numerous topics are explored, from the differences between sustainability and thriving, and the overuse of plastic, to mass extinction, the role of natural disasters and more. The Covid-19 pandemic offers an added perspective on the relationship between disease and the environment.

Sanathana Sarathi English Volume 07 (2012 - 2021) Feb 17 2022 Started in 1958, Sanathana Sarathi is a monthly magazine devoted to Sathya (Truth), Dharma (Righteousness), Shanti (Peace) and Prema (Love) - the four cardinal principles of Bhagawan Baba's philosophy. It is published from Prasanthi Nilayam (the Abode of Highest Peace) and acts as a mouthpiece of Baba's Ashram as it speaks of the important events that take place in His sacred Abode, besides carrying Divine Messages conveyed through Divine Discourses of Bhagawan Sri Sathya Sai Baba. The word meaning of Sanathana Sarathi is the 'Eternal Charioteer'. It signifies the presence of the Lord in every being as the atma guiding their lives like a charioteer. It implies that he who places his life, the body being likened to a chariot, in an attitude of surrender in the hands of the Lord, will be taken care of by the Lord even as a charioteer would take the occupant of his chariot safely to its destination. The magazine is an instrument to disseminate spiritual knowledge for the moral, physical and mental uplift of humanity without any discrimination as the subject matter discussed therein is always of common interest and of universal appeal. The fifteen Vahinis - streams of sacredness - known as the Vahini Series comprising annotation and interpretation of the Upanishads and other scriptures, Itihasas like the Ramayana, the Bhagavatha and the Mahabharata, and authentic explanations on Dhyana, Dharma, Prema, etc., have been serially published in this magazine as and when they emanated from the Divine pen of Bhagawan Baba. This magazine is published in almost all Indian languages, English and Telugu from Prasanthi Nilayam and others from respective regions. Every year Sanathana Sarathi comes out with a special issue in November commemorating the Divine Birthday. The English and Telugu magazines are posted on the 10th and 23rd respectively, of every month, from Prasanthi Nilayam. This magazine has wide, ever increasing circulation in India as well as abroad, as the study of it brings the reader closer to the philosophy of the Avatar in simple understandable language THUS SPAKE SAL... Discouraging during the launch of Sanathana Sarathi... From this day, our Sanathana Sarathi will lead to victory the cohorts of truth - the Vedas, the Sastras and similar scriptures of all faiths, against the forces of the ego such as injustice, falsehood, immorality and cruelty. This is the reason why it has emerged. This Sarathi will fight in order to establish world prosperity. It is bound to sound the paean of triumph when universal Ananda is achieved.

The Daily Mass Readings 2017: A Simple Reference Guide Apr 19 2022

The Chinese Space Programme in the Public Conversation about Space Oct 01 2020 This study is the product of a long view of space exploration and the conversations about space in China. It locates the multiple conversations about space exploration and utilisation as they are in the Peoples' Republic of China (PRC), within other conversations about space culture in the world. China is viewed by Western researchers though many lenses which are examined here critically. In previous studies, writers explain away China's space programme with the easy answers of a "Space Race" and a "China Threat", in which the

space programme is seen as merely an example of global competition, or threat, but this thesis challenges those barriers to Western understanding of the Chinese public conversation of space culture. In this study, critical theory and an underlying epistemology within a post-Enlightenment cultural frame are applied to official, archival and ephemeral texts and images. The manner of the critical application is distinguished from derivative techniques operationalised as Open Source Intelligence. The concept of Place, and within that, Foucault's linguistic concept of "Heterotopia", is significant both in understanding the Chinese overseas space bases on Earth and the temporal and spatial dislocations experienced in space missions. In acknowledging the interpretative approach, an empirical study, a "Q-sort" has been carried out, which demonstrates that the key factor in the Chinese conversation is Science, within the context of modernisation, tempered by Chinese cultural affirmation and international co-operation. The thesis concludes by providing general principles in future work for successful research into the popular culture of space exploration.

The Failure of Financial Regulation May 28 2020 "This publication could not be more timely. Little more than a decade after the global financial crisis of 2008, governments are once again loosening the reins over financial markets. The authors of this volume explain why that is a mistake and could invite yet another major crisis." —Benjamin Cohen, University of California, Santa Barbara, USA "Leading political scientists from several generations here offer historical depth, as well as sensible suggestions about what reforms are needed now." —John Kirton, University of Toronto, Canada, and Co-founder of the G7 Research Group "A valuable antidote to complacency for policy-makers, scholars and students." —Timothy J. Sinclair, University of Warwick, UK This book examines the long-term, previously underappreciated breakdowns in financial regulation that fed into the 2008 global financial crash. While most related literature focuses on short-term factors such as the housing bubble, low interest rates, the breakdown of credit rating services and the emergence of new financial instruments, the authors of this volume contend that the larger trends in finance which continue today are most relevant to understanding the crash. Their analysis focuses on regulatory capture, moral hazard and the reflexive challenges of regulatory intervention in order to demonstrate that financial regulation suffers from long-standing, unaddressed and fundamental weaknesses.

Practical Perpetual Calendars Nov 21 2019 Perpetual calendars are a fascinating way to look at time, and can be defined in a variety of ways. In a comprehensive how-to manual, James Saltvold shares valuable insight on how to use his unique concepts to make practical perpetual calendars for everyday home and office use. These calendars, which save resources and look like a conventional calendar, can be set to display any month for any year within their range. They are set by simply moving a slider, and typically have a range of 50 to 100 years. Saltvold uses skills he acquired during an engineering career to present design ideas and concepts for calendars that are easy to produce and use. After providing a brief description of the four types or categories that his calendars fit into, Saltvold leads readers on an informative journey, enhanced by figures and tables. He explains how to bring calendar prototypes into mass production, describes products that can be made from the four types of perpetual calendars, details which products might be attractive to various markets and manufacturers, and shares a brief history of his own work in developing concepts and researching patents. Additional sections include material on where to search for more information on perpetual calendars, as well as references with comments. Practical Perpetual Calendars includes designs for desk calendars, wall calendars, pocket calendars, photo holders, and other applications. The calendars shown on the front cover are described on the following pages: wall calendar (p. 129), clock (p. 77), pocket calendar (p. 68), full-year calendar (p. 157), 7-column desk calendar (p. 145), and 13-column desk calendar (p. 120).

Drugs, Money, and Secret Handshakes Aug 11 2021 In the warped world of prescription drug pricing, generic drugs can cost more than branded ones, old drugs can be relaunched at astronomical prices, and low-cost options are shut out of the market. In *Drugs, Money and Secret Handshakes*, Robin Feldman shines a light into the dark corners of the pharmaceutical industry to expose a web of shadowy deals in which higher-priced drugs receive favorable treatment and patients are channeled toward the most expensive medicines. At the center of this web are the highly secretive middle players who establish coverage levels for patients and negotiate with drug companies. By offering lucrative payments to these middle players (as well as to doctors and hospitals), drug companies ensure that inexpensive drugs never gain traction. This system of perverse incentives has delivered the kind of exorbitant drug prices - and profits - that everyone loves except for those who pay the bills.

Artists in the Archive Jan 24 2020 Artists in the Archive explores the agency and materiality of the archival document through a stunning collection of critical writings and original artworks. Taking a fresh look at the relationships between insider know-how and outsider knowledge, Artists in the Archive opens a vital dialogue between a global range of artists and scholars. It seeks to trouble the distinction between artistic practice and scholarly research, offering disciplinary perspectives from experimental theatre, performance art, choreography and dance, to visual art making, archiving and curating.

BRICS and the New American Imperialism Jun 16 2019 Challenges the mainstream understanding of BRICS and US dominance to situate the new global rivalries engulfing capitalism BRICS is a grouping of the five major emerging economies of Brazil, Russia, India, China and South Africa. Volume five in the Democratic Marxism series, BRICS and the New American Imperialism challenges the mainstream understanding of BRICS and US dominance to situate the new global rivalries engulfing capitalism. It offers novel analyses of BRICS in the context of increasing US induced imperial chaos, deepening environmental crisis tendencies (such as climate change and water scarcity), contradictory dynamics inside BRICS countries and growing subaltern resistance. The authors revisit contemporary thinking on imperialism and anti-imperialism, drawing on the work of Rosa Luxemburg, one of the leading theorists after Marx, who attempted to understand the expansionary nature of capitalism from the heartlands to the peripheries. The richness of Luxemburg's pioneering work inspires most of the volume's contributors in their analyses of the dangerous contradictions of the contemporary world as well as forms of democratic agency advancing resistance. While various forms of resistance are highlighted, among them water protests, mass worker strikes, anti-corporate campaigning and forms of cultural critique, this volume grapples with the challenge of renewing anti-imperialism beyond the NGO-driven World Social Forum and considers the prospects of a new horizontal political vessel to build global convergence. It also explores the prospects of a Fifth International of Peoples and Workers.
