Violence All Around Feb 05 2021 A human rights lawyer travels to hot zones around the globe before and after 9/11 to document abuses by warlords, terrorists, and counterterrorism forces. John Sifton reminds us that human rights advocates can only shame the world into better behavior; to invoke rights is to invoke the force to uphold them, including the very violence they deplore.

Screening Protest Jul 10 2021 Screening Protest brings together a range of scholarly perspectives on the study of protest mediations on television and in film. Arguing that the screen is a fruitful, if overlooked, analytical focus, the book explores how visual narratives of protest wander across borders - territorial, temporal and generic. Chapters compare coverage of major protests in recent history by global news channels like Al Jazeera English, BBC World, CNN International and RT. They consider how geopolitical agendas, newsroom culture and the ubiquity of eyewitness footage shape the narration of events such as the 'Umbrella Revolution' in Hong Kong, anti-austerity protests in Greece, pro-EU mobilizations in the Ukraine and clashes in Ferguson. A focus on narrative allows authors to compare such news stories with popular cultural depictions of the protester, in films and television series such as The Hunger Games, Robin Hood and Suffragette. Although focussed on the screen, the scope of the book is broad, given its exploration of images distributed worldwide. Written with both scholars and students in mind, Screening Protest will interest researchers in political science, sociology, media and film studies, as well as the general reader interested in current affairs.

Scenography and Art History Jun 21 2022 Scenography and Art History reimagines scenography as a critical concept for art history, and is the first book to demonstrate the importance and usefulness of this concept for art historians and scholars in related fields. It provides a vital evaluation of the contemporary importance of scenography as a critical tool for art historians and scholars from related branches of study addressing phenomena such as witchy designs, Early Modern festival books, live rock performances, digital fashion photography, and outdoor dance interventions. With its nuanced and detailed case studies, this book is an innovative contribution to ongoing debates within art history and visual studies concerning multisensory events. It extends the existing literature by demonstrating the importance of a reimagined scenography concept for comprehending historical and contemporary art histories and visual cultures more broadly. The book contends that scenography is no longer restricted to the traditional space of the theatre, but has become an important concept for approaching art historical and contemporary objects and events. It explores scenography not solely as a critical approach and theoretical concept, but also as an important practice linked with unrecognized labour and broader political, social and gendered issues in a great variety of contexts, such as festive culture, sacred settings, fashion, film, or performing arts. Designed as a key resource for students, teachers and researchers in art history, visual studies, and related subjects, the book, through its cross-disciplinary frame, does consider, implicitly and explicitly, the roles of both scenography and art in society.

Revival: Old English Instruments of Music (1910) May 28 2020 The study of musical instruments now no longer with us is necessary, not only for the musician and composer, but for the man of letters, the artist, and the chronicler of our national life; for many allusions to customs of bygone times cannot otherwise be understood, and we should be spared such a trying ordeal as we were recently subjected to by one of our leading illustrated papers, which introduced into a thirteenth century scene a twentieth century mandoline with an up to date mechanism.

William Basinski [drone & ambient musician] Aug 11 2021 The next title in the "Music You Should Hear Series" is a profile of drone/ambient musician William Basinski. His work as a musician, composer, remixer, and producer is a marriage of opposites: classical/populist; ephemeral/timeless; Eastern/Western (both in terms of the United States, and the wider world); inspired/crafted, ambient/overwhelming. Basinski's music - largely focused on aged recordings made with archaic technology - is an extended meditation on longing and decay, bursting forth into an infinite state of eternal grace.

Why You Like It Dec 03 2020 From the chief architect of the Pandora Radio's Music Genome Project comes a definitive and groundbreaking examination of how your mind, body, and upbringing influence the music you love. Everyone loves music. But what is it that makes music so universally beloved and have such a powerful effect on us? In this sweeping and authoritative book, Dr. Nolan Gasser—a composer, pianist, and musicologist, and the chief architect of the Music Genome Project, which powers Pandora Radio—breaks down what musical taste is, where it comes from, and what our favorite songs say about us. Dr. Gasser delves into the science, psychology, and sociology that explains why humans love music so much; how our brains process music; and why you may love Queen but your best friend loves Kiss. He sheds light on why babies can clap along to rhythmic patterns and reveals the reason behind why different cultures around the globe identify the same kinds of music as happy, sad, or scary. Using easy-to-follow notated musical scores, Dr. Gasser teaches music fans how to become engaged listeners and provides them with the tools to enhance their musical preferences. He takes readers under the hood of their favorite genres—pop, rock, jazz, hip hop, electronica, world music, and classical—and covers songs from Taylor Swift to Led Zeppelin to Kendrick Lamar to Bill Evans to Beethoven, and through their work, Dr. Gasser introduces the musical concepts behind why you hum along, tap your foot, and feel deeply. Why You Like It will teach you how to follow the musical discourse happening within a song and thereby empower your musical taste, so you will never hear music the same way again.

The Drone Memos Jan 16 2022 "A trenchant summation" and analysis of the legal rationales behind the US drone policy of targeted killing of suspected terrorists, including US citizens (Publishers Weekly, starred review). In the long response to 9/11, the US government initiated a deeply controversial policy of "targeted killing"—the extrajudicial execution of suspected terrorists and militants, typically via drones. A remarkable effort was made to legitimize this practice; one that most human rights experts agree is illegal and that the United States has historically condemned. In The Drone Memos, civil rights lawyer Jameel Jaffer presents and assesses the legal memos and policy documents that enabled the Obama administration to put this program into action. In a lucid and provocative introduction, Jaffer, who led the ACLU legal team that secured the release of many of the documents, evaluates the drone memos in light of domestic and international law. He connects the documents' legal abstractions to the real-world violence they allow, and makes the case that we are trading core principles of democracy and human rights for the illusion of security. "A careful study of a secretive counterterrorism infrastructure capable of sustaining endless, orderless war, this book is profoundly necessary." —Katrina vanden Heuvel, editor and publisher of The Nation

Writing about music May 08 2021 I've been listening to music ever since I was small. A few years ago I started to write about it. I started to blog and to tweet and to generally annoy anyone who would care to read my secular evangelical rantings about Jonathan Richman, and my inexplicable love of kitschy popular music, disco, hip-hop and doo-wop. Very soon I was writing for the North East's premier music magazine NE:MM, which became the North East's premier music website. Most of my NE:MM album and gig reviews are included in 'Writing about music' - I've corrected most of the spellings, but I've left in all of the grammatical errors (I prefer to think of them as 'quirks'). Many of my interviews are here too, Roger McGuinn, Nils Lofgren, Matthew Healy, Ben Watt, Fish, Kathryn Williams, Duke Special, Penetration, Thomas Truax, Steve Hackett and Nick Heyward, who told me he thought Haircut 100 were going to become Britain's Talking Heads. There's other stuff too. Quite a few lists (let's face it, making lists is what middle-aged men do best) including my favourite 50 debut albums, which proved hugely controversial with three people on Twitter. And (by the way, I regularly start sentences with 'and'. If you're easily offended, please look away) there are some excerpts from another book that's in the pipeline. Quite a long way down the pipeline if I can be brutally honest.

Dolphin Drone Jun 28 2020 A taught, high-concept thriller that humanizes the men and women behind military espionage. James Grundvig's *Dolphin Drone* takes us into the complex underworld of global terrorism with razor-sharp plot twists, remarkable characters, and fascinating insight into the technological advancements of the US Navy. Using dolphin sonar-tracking technology, Ex-Navy SEAL Merk Toten stumbles of freshly laid Iranian sea mines while conducting surveillance on two US ships that were hijacked by Somali pirates on the Strait of Hormuz. This discovery occurs on the same day that a fake intelligence report draws three US drones away from the Persian Gulf. Toten investigates the parallel events to uncover a new super-terrorist group made up of a network of Somali warlords, Islamic assailants, Yemen-based terrorists, and ISIS sympathizers. When Merk Toten and the beautiful CIA Operative Jenny Myung King discover a plot by this new terrorist organization to bomb New York Harbor, the duo must race against the clock to stop the devastating attack. *Dolphin Drone* is a tense thriller that combines cutting-edge marine technology, high-stakes undercover operations, and complex and frightening political underpinnings. Drone Strike-Analyzing the Impacts of Targeted Killing Apr 26 2020 The intense debate over US targeted drone strikes outside war zones has been limited by the failure to review and assess a considerable body of quantitative research and qualitative material on the impacts of such strikes on terrorist groups and civilians. This book fills an important gap in the literature by conducting a careful and rigorous review of such evidence. It argues that decisions about the use of targeted strikes as a counterterrorism instrument, as well as legal and ethical evaluations of such use, must be informed by our best understanding of the insights that empirical evidence can provide on the effectiveness of strikes and the costs they impose on populations where they occur. Mitt Regan is McDevitt Professor of Jurisprudence and Co-Director of the Center on National Security at Georgetown Law Center, and Senior Fellow at the Stockdale Center for Ethical Leadership at the US Naval Academy. .

"I Have Nothing to Hide" Sep 12 2021 An accessible guide that breaks down the complex issues around mass surveillance and data privacy and explores the negative consequences it can have on individual citizens and their communities. No one is exempt from data mining: by owning a smartphone, or using social media or a credit card, we hand over private data to corporations and the government. We need to understand how surveillance and data collection operates in order to regain control over our digital freedoms—and our lives. Attorney and data privacy expert Heidi Boghosian unpacks widespread myths around the seemingly innocuous nature of surveillance, sets the record straight about what government agencies and corporations do with our personal data, and offers solutions to take back our information. "I Have Nothing to Hide" is both a necessary mass surveillance overview and a reference book. It addresses the misconceptions around tradeoffs between privacy and security, citizen spying, and the ability to design products with privacy protections. Boghosian breaks down misinformation surrounding 21 core myths about data privacy, including: • "Surveillance makes the nation safer." • "No one wants to spy on kids." • "Police don't monitor social media." • "Metadata doesn't reveal much about me." • "Congress and the courts protect us from surveillance." • "There's nothing I can do to stop surveillance." By dispelling myths related to surveillance, this book helps readers better understand what data is being collected, who is gathering it, how they're doing it, and why it matters.

The Encyclopedia Britannica Feb 23 2020

Shadow Wars Jun 16 2019 Warfare's evolution, especially since 2001, has irrevocably changed the meaning of war. In the twentieth century humankind's bloodiest 231 million people died in armed conflicts. Battlefield deaths since then have been steadily declining, despite the wars in Iraq and Afghanistan, and by 2012 less than 1 person in a million dies in war every year. This drastic change has led some academics to label our era one of peace, recalling the erroneously named 'Hundred Years' Peace' or 'Pax Britannica' of the nineteenth century, which nonetheless saw many violent conflicts. But war hasn't gone extinct. It has merely evolved. In Shadow Wars, journalist David Axe tells the story of the new war era of insurgents and counterinsurgents, terrorists and their hunters, pirates, mercenaries, smugglers, and slavers wreaking havoc on regions where conditions are brutal, people are poor, governments are weak, and the world rarely pays attention. Axe shows us what war has become in our era of peace. The mainstream media, meanwhile, ignores it. This book profoundly challenges readers' conceptions of war and peace in the twenty-first century.

Jack Dillon: the Space Drone Mar 26 2020 When visitors from across the Galaxy finally took notice of our little blue planet, they immediately let the leaders of Earth's governments know that they were here to take over. Resistance (as the saying goes) would be futile against this race of giants who proved that their technology and weapons were far more advanced than our own. The planet Earth would be a colonized state, with or without the humans' consent. For over 100 years, men have lived under this "Stendaaran" rule, choosing to co-exist with their extraterrestrial conquerors than to go extinct because of them. Private detective, Jack Dillon, had a huge problem with this arrangement, even though he was powerless to do anything about it. He hated aliens—all spaces leeches (as he liked to call them). But all that changed the day one hired him to solve the case of a stolen relic. And while cut trying to find this thief, Jack would ultimately discover that we need these savvy invaders (for our ultimate survival) in more ways than one.
